Catalog # MOG-M82E7

# ACCO

### Synonym

 $MOG, BTN6, BTNL11, MOGIG2, NRCLP7, Myelin\ oligodendrocyte\ glycoprotein$ 

### Source

Biotinylated Mouse MOG Protein, His, Avitag(MOG-M82E7) is expressed from human 293 cells (HEK293). It contains AA Gly 29 -Thr 156 (Accession # <u>Q61885</u>).

Predicted N-terminus: Gly 29

## **Molecular Characterization**

This protein carries a polyhistidine tag at the C-terminus, followed by an Avi tag (Avitag<sup>TM</sup>)

The protein has a calculated MW of 18.2 kDa. The protein migrates as 21-25 kDa when calibrated against <u>Star Ribbon Pre-stained Protein Marker</u> under reducing (R) condition (SDS-PAGE) due to glycosylation.

## Labeling

Biotinylation of this product is performed using Avitag<sup>™</sup> technology. Briefly, the single lysine residue in the Avitag is enzymatically labeled with biotin.

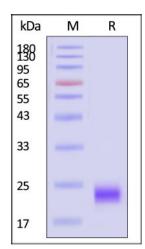

## **Protein Ratio**

Passed as determined by the HABA assay / binding ELISA.

## Endotoxin

Less than 1.0 EU per  $\mu g$  by the LAL method.

# **SDS-PAGE**

#### Biotinylated Mouse MOG Protein, His, Avitag on SDS-PAGE under reducing

## Purity

>90% as determined by SDS-PAGE.

>90% as determined by SEC-MALS.

## Formulation

Lyophilized from 0.22  $\mu$ m filtered solution in PBS, pH7.4 with trehalose as protectant.

Contact us for customized product form or formulation.

### Reconstitution

Please see Certificate of Analysis for specific instructions.

For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.

### Storage

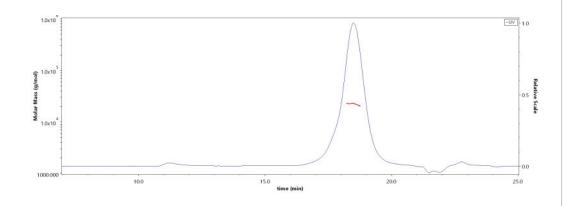

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

- -20°C to -70°C for 12 months in lyophilized state;
- -70°C for 3 months under sterile conditions after reconstitution.

## **SEC-MALS**

The purity of Biotinylated Mouse MOG Protein, His, Avitag (Cat. No. MOG-

(R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90% (With <u>Star Ribbon Pre-stained Protein Marker</u>).

M82E7) is more than 90% and the molecular weight of this protein is around 18-26 kDa verified by SEC-MALS. Report

# Biotinylated Mouse MOG Protein, His,Avitag™ (MALS verified)

#### Catalog # MOG-M82E7

Myelin oligodendrocyte glycoprotein (MOG), is a single-pass transmembrane glycoprotein of the immunoglobulin (Ig) superfamily. MOG is a myelin protein exclusively expressed in the CNS at the outermost surface of myelin sheaths and oligodendrocyte membranes. This makes MOG a potential target of cellular and humoral immune responses in inflammatory demyelinating diseases. Due to its late postnatal developmental expression, MOG is an important marker for oligodendrocyte maturation.
